

Graduate School of Business Administration

Outline of Research Advising

Master's Program

1. Content of research advising in each semester

- 1st semester; After their academic supervisors and co-supervisors are decided, students submit notification of the thesis title in consultation with their supervisors. Students take courses taught by instructors in the fields that are related to their research theme, in consultation with their supervisors.
- 2nd semester; Students review the latest research trends in related fields and survey previous studies based on the questions that they are addressing.
- 3rd semester; Students may update the research title in consultation with their supervisors. Students complete a review of previous studies and conduct field surveys and other necessary activities based on their determined research theme. They also present the research findings at the interim report meeting.
- 4th semester; Students decide the overall goal of their master's thesis, and write the thesis in conformity with "Notes on Master's Thesis Writing" in the Academic Catalog for Graduate Schools. Students enhance the integrity of their research by accumulating experience by making presentations at seminars, etc., and complete their master's thesis.

2. Outline of thesis presentation meetings (sessions) and the requirements for presentations

- All academic supervisors and co-supervisors attend the interim report meeting (hereinafter, "the report meeting"), in principle.
- The date, time and venue of the report meeting are announced by the Education Affairs Section for Graduate Schools at least two weeks before the date of the report meeting, in principle.
- Attendees must follow the directions of the Course Chair or Dean, who presides over the report meeting.
- Reporters must carry with them the necessary number of copies of the report summary to the report meeting and make an oral report including a Q & A session within about 30 minutes.
- If at the report meeting, the supervisors recommend modification of the reported thesis, reporters must modify it by the date designated by the supervisors and submit it to the supervisors together with a table comparing the previous and modified versions.
- The report meeting can be attended by Master's Program students regardless of their year of study. Therefore, it is desirable for Master's Program students other than reporters to attend the report meeting to listen to the reports on their own initiative.

3. Research paper

The Small-and-Medium Enterprise Management Consultant Registration Training Division of the Course of Business, Accounting and Finance allows students to submit a research paper on a specific subject instead of a master's thesis. A research paper on a specific subject denotes a paper written based on practical surveys and research on a specific subject. Students who aim to submit a research paper on a specific subject must meet the following requirements in the process of submission.

- If students aim to submit a research paper on a specific subject, they must decide to do so in consultation with their academic supervisors and co-supervisors at the time of enrollment, in principle.
- The research paper on the specific subject must have 40,000 characters or more.
- The rules concerning master's theses also apply to the requirements for submitting a research paper on a specific subject, the style of the paper, and the deadline for submitting it.
- Students who aim to advance to the Doctoral Program must choose to submit a master's thesis.

Doctoral Program

1. Content of research advisement in each semester

- | | |
|--------------|--|
| 1st semester | After their academic supervisors and co-supervisors are decided, students submit the thesis title in consultation with their supervisors.
Students take courses taught by instructors in fields that are related to their research theme, in consultation with their supervisors. |
| 2nd semester | Students make oral presentations at academic conferences and write papers to be submitted to academic journals.
Students submit a research report and make a presentation at a research report meeting. |
| 3rd semester | Students may update the thesis title in consultation with their supervisors.
Students further deepen the content of their research. They also make oral presentations at academic conferences and submit papers to academic journals. |
| 4th semester | Students decide on a framework for their doctoral thesis.
Students submit a research report and make a presentation at an interim report meeting. |
| 5th semester | Students may update the thesis title in consultation with their supervisors.
Students make a presentation at an interim report meeting and receive advisement on necessary modifications to their doctoral thesis. |
| 6th semester | <ul style="list-style-type: none">• Students submit their doctoral thesis (tentative) to their academic supervisor.• Students present their thesis at a public hearing.• Students submit their doctoral thesis and undergo the procedure for the thesis review.• Students receive a thesis review and take the final exam.• Students submit a research report. |

2. Outline of thesis presentation meetings (sessions) and the requirements for presentations

- A research report meeting is held based on the research reports at the end of the 2nd semester.
- An interim report meeting is held based on the research reports at the end of the 4th semester.
- An interim report meeting is held at the end of the 5th semester
- All academic supervisors and co-supervisors attend the research report meeting and the interim report meetings (hereinafter, "report meetings"), in principle.
- The date, time and venue of the report meeting are announced by the Education Affairs Section for Graduate Schools at least two weeks before the date of the report meeting, in principle.
- Attendees must follow the directions of the Course Chair or Dean, who presides over the report meeting.
- Reporters must carry with them the necessary number of copies of the report summary to the report meeting, and make an oral report including a Q & A session within about 60 minutes.
- If at the report meeting, the supervisors recommend modification of the reported thesis, reporters must modify it by the date designated by the supervisors and submit it together with a table comparing the previous and modified versions to the supervisors.

Notes on Master's Thesis Writing

Formulated in October 1998
Revised in March 2009
Revised in February 2016
Revised in January 2017
Graduate School of Business Administration

1. Basic attitudes

It is desirable for you as students of the Graduate School of Business Administration to always keep the following matters in mind while conducting research activities during your enrollment.

- (1) A master's thesis is an academic dissertation written for a master's degree.
- (2) Aim to ensure that the quality of your masters' thesis will reach global standards.

2. Thesis writing and research advising

- (1) Continue to communicate closely with your research advisers.
- (2) Make active efforts to ask instructors other than your research advisers for comments or advice.

3. What to do if you are unconvinced of advice given by your research advisers

- (1) Thoroughly examine why you are unconvinced from a dispassionate and academic perspective.
- (2) Confirm the "principle of research advising" (No one should be forced to accept certain theories, themes, research methods or conclusions without sufficient reason).
- (3) Consult other research advisers.
- (4) Consult instructors who know you well through classes, etc.
- (5) Consult the Course Chair or Dean.

4. Matters that require special attention while you write your master's thesis

- (1) Consider who will read your master's thesis.
 - ① Your Chief Thesis Examiner and Deputy Thesis Examiner
 - ② Instructors in charge of your oral exam
→ For example, no explanations or descriptions of basic theoretical matters are needed.
 - ③ Your junior graduate students
 - ④ Future readers, including persons in charge of your employment exam
- (2) Write your master's thesis so that its content will be understood accurately.
Note that a good master's thesis is not always what is called an "excellent composition" in the native language course.
- (3) Write your master's thesis in conformity with general style rules.
→ Refer to "7. Guidelines for thesis writing."

5. Volume and style

- (1) A master's thesis must have a volume of 22,000 to 44,000 words.
- (2) Write on A4-size sheets with a word processor application.
- (3) A standard page should be single-spaced. Font size for the main text should be 10.5 to 12.0 points in principle.
- (4) Copies of the thesis must be bound. Both the cover and spine must show the title of the thesis, the academic year of completion, and the author's name.
(Refer to "6. Submission of a master's degree thesis or the research paper - (3) Precautions when writing a master's degree thesis or the research paper" on page 28 of this Academic Catalog.

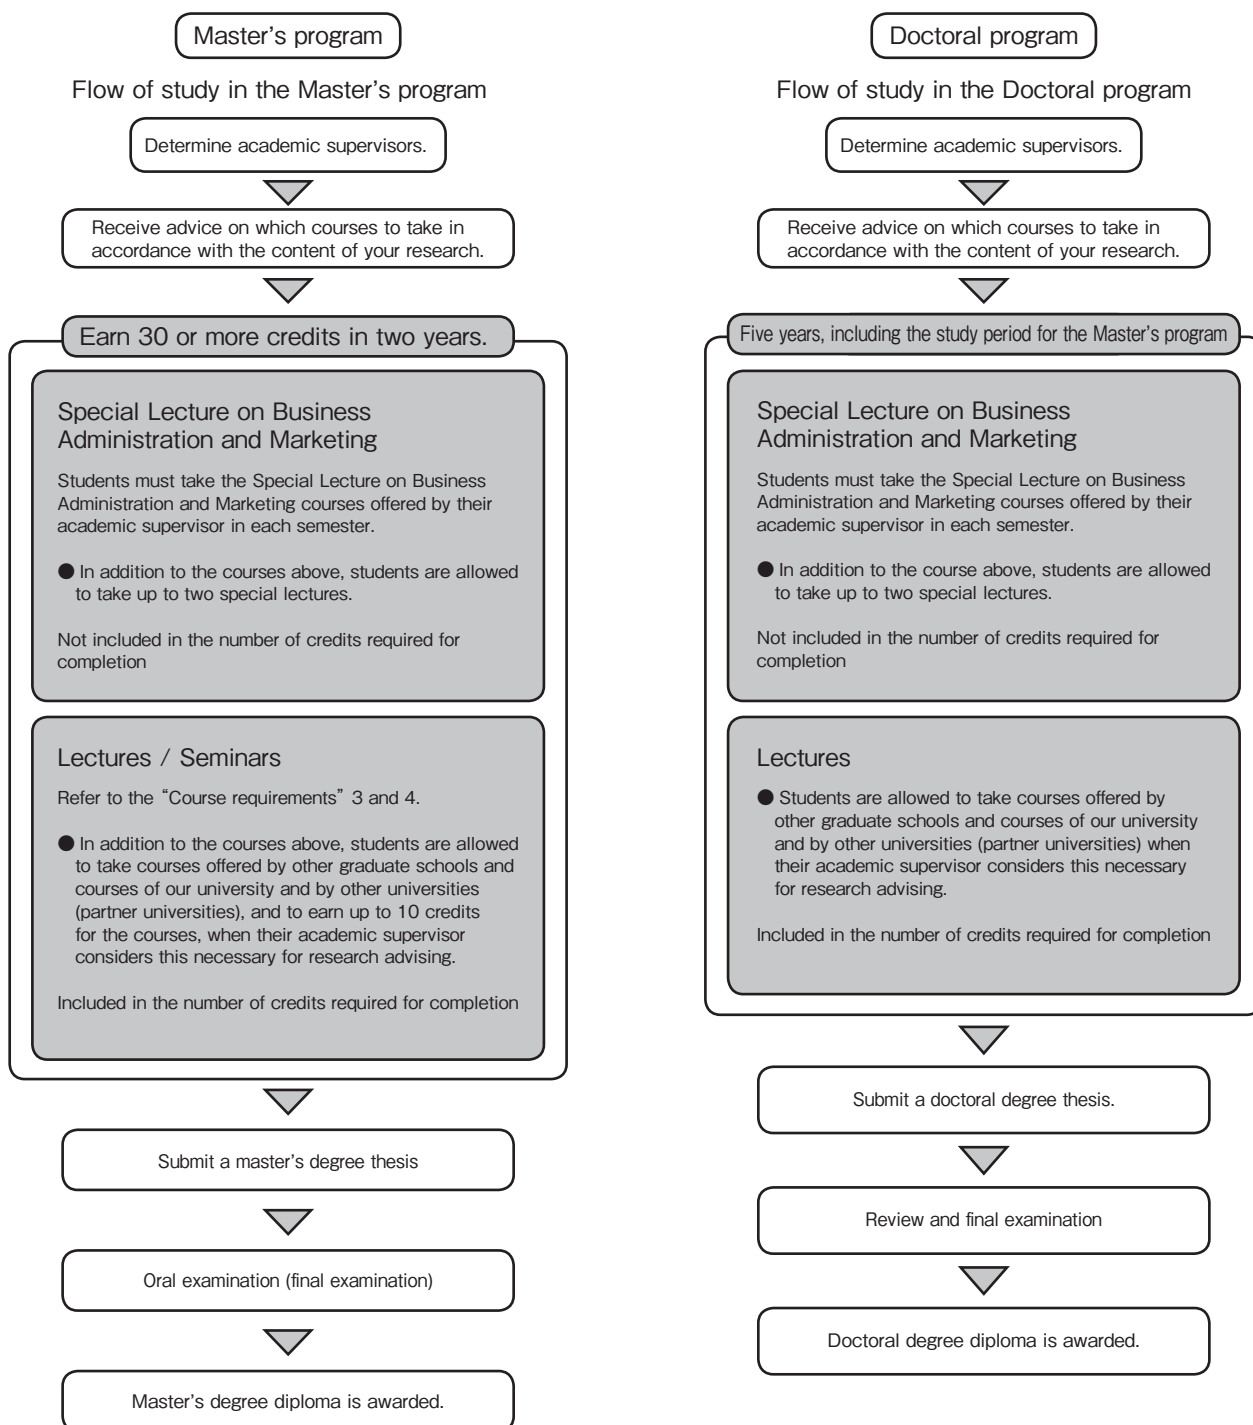

6. Number of copies of the thesis and abstract to be submitted

- (1) Submit two bound copies of the thesis. While softbound copies are acceptable before the oral exam, be sure to submit a final hardcover copy.
- (2) Submit the designated number of copies of the thesis abstract (about 1,100 words).
- (3) Submit the thesis and abstract by the deadline designated for the relevant academic year.

7. Guidelines for thesis writing

For guidelines for thesis writing, refer to "Graduate School of Business Administration Guide to Master's Thesis Writing."

Course of Business Administration and Marketing

※ The graduate school of Business Administration will determine whether or not the student has satisfied the completion requirements for master's / doctoral degree based on the content of the thesis and the results of oral examination, which are assessed by the relevant faculties of the courses the student majored in, and reviewed the Dean of the graduate school of Business Administration and submitted to the committee for its judgement.

※ In this course, we encourage participation and presentation in overseas surveys, researches and academic conferences as part of classes and/or research guidance, in order to deeper students' understanding of the contents of their lessons and their own researches.

Credits and other completion requirements.

- 1) Earn 30 credits or more from courses recognized as completion requirements.
- 2) Students are required to, in each semester, take a course in which research advising is provided by the main academic supervisor and earn the required credits.

Course requirements

1. Students must determine which courses to take according to instructions from their supervisors.
2. A total of two supervisors must be chosen: one academic supervisor and one co-supervisor. However, two co-supervisors may be chosen at the discretion of the academic supervisor. A total of two supervisors must be chosen: one academic supervisor and one co-supervisor. However, two co-supervisors may be chosen at the discretion of the academic supervisor. Students are allowed to take up to three special lectures (one academic supervisor and two co-supervisors) in each semester.
3. Students can earn up to 8 credits of seminar courses taught by their academic advisor.
4. Students can earn up to 4 credits of seminar and lecture courses taught by a professor other than their academic advisor.
5. In addition to the courses listed in the above table, students are allowed to take courses offered by other graduate schools and courses of our university and by other universities (partner universities) on Article 8 of the Graduate School Academic Rules and Regulations, when their academic supervisors consider this necessary for education and research purposes. (In such cases, each subject can be counted toward the completion requirements only once. The grades and credits earned by taking the same subject a second time or more can be approved but will not be counted toward the completion requirements.)
Moreover, the credits earned from subjects taken through the above-mentioned method, together with credits students earned before the admission to the graduate school treated as credits earned at this graduate school based on Article 10-2 of the Graduate School Academic Rules and Regulations (already earned credits), can be counted toward the completion requirements up to a maximum of 10 credits.
6. Students who do not belong to the Graduate School of Business Administration are not allowed to take any seminars with special lectures simultaneously offered by supervisors or co-supervisors.
7. Regarding submission of master' s thesis, refer to p.184.

Credits and other completion requirements

- 1) Students are required to, in each semester, take a course in which research advising is provided by the main academic supervisor.

Course requirements

1. Students must determine which courses to take according to instructions from their supervisors.
2. A total of two supervisors must be chosen: one main academic supervisor and one co-supervisor. However, two co-supervisors may be chosen at the discretion of the academic supervisor. Students are allowed to take up to three special lectures (one main academic supervisor and two co-supervisors) in each semester.
3. In addition to the courses listed in the above table, students are allowed to take courses offered by other graduate schools and courses of our university and by other universities (partner universities), when their academic supervisors consider this necessary for education and research purposes.
