TOYO UNIVERSITY

Toyo Top Global Scholarship A
English-track Programs

2020
President’s Message

Throughout a history of 130 years, Toyo University has always recognized the importance of a global perspective in education. Founder Dr. Enryo Inoue traveled around the world three times to learn about the philosophies and educational systems from Europe, Asia, and North America. These scholarly journeys were instrumental in defining the educational offerings of Toyo University, giving them a more worldly perspective decades before globalization became an educational buzzword. Dr. Enryo Inoue’s concept of global education was truly ahead of its time.

That spirit lives on through the initiatives we are adapting through the Top Global University project. In 2014, Toyo was one of 37 universities nationwide selected by Japan’s Ministry of Education, Culture, Sports, Science and Technology (MEXT) to receive 10 years’ worth of grants to help bring our vision of being a truly global university into reality. As part of the Top Global University project, we created three new academic faculties, the Faculty of Information Networking for Innovation and Design, the Faculty of Global and Regional Studies, and the Faculty of International Tourism Management. As a member of the students for these faculties, you have an opportunity to be a globally talented individual.

Toyo is offering full scholarships that cover tuition, housing allowance, and living expenses for four years to 60 outstanding international students who are potential global leaders in the future.

We hope you will join us as we take the next steps in an educational journey that started in Tokyo more than 130 years ago and has spread around the world.
### Facts and Figures as of 2019

----------------------------------------

#### HISTORY

Founded in **1887**

#### FACULTIES AND DEPARTMENTS

- **13** faculties and
- **46** departments

#### GRADUATE SCHOOLS AND COURSES

- **15** graduate schools and
- **36** courses

#### DOUBLE DEGREE PROGRAMS

- **4**

#### FACULTY (full-time) as of May 1, 2019

- **777**

#### APPLICANTS FOR 2019 ACADEMIC YEAR

- **122,010** applicants
- **TOP 2** among universities in Japan

#### STUDENTS as of May 1, 2019

- **31,640** students
  - (30,826 undergraduate, 814 postgraduate)
- **ALUMNI** as of April 1, 2019
  - **325,355**

#### INTERNATIONAL STUDENTS as of May 1, 2019

- **1,764**

#### MALE TO FEMALE RATIO AMONG STUDENTS

- **6 to 4**

#### STUDENT CLUBS

- **150** sports clubs & groups
- **160** cultural clubs & groups

#### OVERSEAS PARTNER INSTITUTIONS as of May 2019

- **173** universities, **4** consortia, **6** institutions,
- **3** municipalities in **34** countries

#### SELECTED FOR TOP GLOBAL UNIVERSITY PROJECT BY MEXT*

- One of **37** universities nationwide (out of 779) to receive
- **10** years’ worth of grants aimed at helping us become a more internationalized university

*Ministry of Education, Culture, Sports, Science and Technology
Toyo Top Global

A world-class education for tomorrow's Top Global Leaders
Toyo Top Global Scholarship A offers unprecedented access to an elite education free from financial burdens. Students selected for this Scholarship receive waivers for full tuition and all associated fees, plus generous financial support for all four years of their education at Toyo.

**Scholarship**
Tuition and all associated fees waived
Stipend of 150,000 yen/month

**Eligibility**
Any undergraduate student who passed the Toyo Scholarship Examination and has a valid student visa

**Spots Available / year**
Department of Global Innovation Studies: 30 students
Department of Regional Development Studies: 10 students
Department of Information Networking for Innovation and Design: 20 students

**Benefit Period**
Four years (with graduation coming at the end of the fourth year)

**Responsibility**
Toyo Top Global Scholars are expected to cooperate with Toyo University in its endeavor to internationalize its education and research, through participating in various programs and activities both during their studies at Toyo and as alumni.

**Remarks**
Scholarship will be awarded after the recipient has been admitted to Toyo University.
If required academic standards are not maintained, the scholarship (Tuition Waiver and Monthly Stipend) will be suspended after the second year.
Any combination with other Toyo scholarships is not allowed.

Global Innovation Studies (GINOS)
Nguyen Thi Truong An | Vietnam
Toyo University has granted me the wish of living and studying in Japan, a beautiful and peaceful country. With the desire of becoming an Asian Hub for future leaders, GINOS has not only opened the door to global scopes of academic knowledge, but also created a diverse and open environment where we can incubate our future selves, choose how we want to grow, and figure out who we want to be in this world. A year has passed since GINOS’s inception, and the program continues to evolve. This presents an opportunity for the GINOS students, as we are going through this process ourselves and have a chance to make our mark on it.

Regional Development Studies (RDS)
Muhammad Naufal Rahman | Indonesia
Regional Development Studies (RDS) provides many valuable opportunities to apply economic, political, environmental and anthropological perspectives to our studies. We get to learn deeply about both regional and global issues and apply our critical thinking skills to come up with solutions to pressing issues. Furthermore, there are many extracurricular activities that we can take part in, such as internships and volunteer programs. As sustainable development plays an increasingly prominent role on the world stage, the subjects taught in RDS are very useful. This is why I chose to study RDS at Toyo University.
To future Toyo University / RDS students, be active during your four years of university life, seize as many opportunities as you can, and, last but not least, have fun!

Information Networking for Innovation and Design (INIAD)
Veselin Nikolaev Donov | Bulgaria
INIAD is an amazing place, with just a one-year history. This makes it unique, flexible, innovative and ever-changing, but at the same time part of something bigger — Toyo. This combination, plus of course the chance for a full scholarship, convinced me to come all the way to Tokyo. But there is more to Toyo and INIAD than that. The opportunities for meeting people, having unforgettable experiences, and learning are unlimited, with extracurricular activities and events organized all the time! I believe university life is also about making connections, and what better place for that than Toyo!
Faculty of Global and Regional Studies

the Dean

In our globalizing society, a variety of issues, such as economic, environmental, and poverty-related issues, are constantly emerging. For solving these global issues, there is a critical need for innovations in various social systems as well as the spread of these innovations to various regions across the world.

Our school of Global and Regional Studies (GRS) aims to develop human resources that can play an active role in the dynamically changing global community at its two educational programs: GINOS and RDS, for creating innovations in social systems and developing them in local communities.

Welcome to GRS!! Start your global career here, studying with friends from Japan and various parts of the world.

Faculty of Information Networking for Innovation and Design

the Dean

Information Networking for Innovation and Design (INIAD) is a new faculty established in 2017 at Toyo University. As the name suggests, it was established on the premise that the computer technology allows the networking of information and people to bring in new innovations.

Importance of computer application permeates every discipline taught at universities. Students at INIAD must take computer programming course in the first year to take advantage of computer applications in many disciplines they pursue in the future. Based on the programming skill, the students will learn the problem solving skill from team-based collaboration projects in one of the following four courses: Computer Science & Engineering, Digital Design, Business Innovation, and Social Infrastructure.

Overseas students are welcome at INIAD because practical training of collaboration and communication skill is deemed very important and overseas student population on campus will add to the necessity of such skill to finish team-based projects. Classes are offered also in English aside from Japanese. Students who are interested in taking advantage of the computer programming in diverse application fields are encouraged to apply.
GINOS (Department of Global Innovation Studies) has newly established in 2017 with the aim of fostering globally competitive human resources who can create innovations everywhere in the global society. Advocating the basic policy of “Cultivating horizontally oriented global talents in the spirit of philosophy that forms the basis of dialogue with people and the earth,” the Department aims to foster leaders who meet global standards by providing students with dialogue-based problem-solving education in a diversity-friendly environment where all classes are given in English, and all Japanese students are required to study abroad for a year, and 30% of students are international students.

For more than 20 years since its establishment in 1997, the Department of Regional Development Studies (RDS) aims to foster experts who can play an active role in the field “community building/ development”. To solve problems and develop the community, it is necessary to have knowledge to understand underlying problems properly from a global perspective and ability to act in a practical manner. In RDS, students are expected to go to community and to have actual practice to have such ability. To this end, RDS is offering a variety of specialized subjects, small-group seminars, and various field programs in Japan and overseas. Join us at RDS, and study for a brighter future community.
Faculty of Global and Regional Studies

Department of Global Innovation Studies (GINOS)
Campus: Hakusan

- **Areas of Study:**
  Economics and Business Administration, International Relations and Political Science, Culture and Communication Studies

- **Enrollment Capacity:**
  100 students per year

- **Full Scholarship Availability:**
  30 first-year international students will be selected to receive the Top Toyo Global Scholarship A. See p.3 for details.

- **Admission:**
  April/September

- **Language of Instruction:**
  English

- **Vision:**
  Today’s generation faces unprecedented challenges: economic crisis, poverty, scarcity of resources, and international conflicts. Global issues require a global perspective. This Department aims to develop new leaders with an international outlook who can work within existing frameworks and establish new systems to create innovative solutions to today’s problems.

- **Outline:**
  Students learn specialized coursework from three fields of study.
  - **Global Systems**
    Through examining the global financial system and globalization in Japan, students learn about the structure of globalization and its impacts on society.
  - **International Business**
    Students learn about business structures and features with a focus on global entrepreneurs and companies with a track record of success on the international stage.
  - **International Collaboration**
    Students learn about collaboration across countries and regions, including multicultural coexistence, international organizations, international cooperation, and comparative education from international perspectives.

- **Features:**
  - Global learning environment with 70% domestic students and 30% international students
  - Opportunity to develop [design] thinking skills from a global perspective through lectures and project studies (changed from “work”)
  - Intellectual networks with outstanding overseas universities and research institutes
  - Plans to create a five-year bachelor’s and master’s degree combined program
  - Japanese language education, and internship opportunities in Japanese companies

- **Degree Offered:**
  Bachelor of Global Innovation Studies

- **Successful Graduates Will:**
  - Innovate and add value in companies and society
  - Use practical communication skills to play an active role in the international community
  - Share a deep understanding of traditional Japanese culture and thought with the world
  - Have the ability and motivation to start up new business and social enterprises

- **Career Paths:**
  - Global companies, NPOs, public agencies, entrepreneurs, consultants, marketing professionals, researchers, etc.
### Subject List  
(as of 2019 Academic Year)

Department of Regional Development Studies (RDS)
Campus: Hakusan

- **Areas of Study:** Regional Development, International Relations
- **Enrollment Capacity:** 210 students per year
- **Full Scholarship Availability:**
  10 first-year international students will be selected to receive the Top Toyo Global Scholarship. See p.3 for details.
- **Admission:**
  April
- **Language of Instruction:**
  Japanese/English

- **Vision:**
  RDS students develop expertise in evaluating serious local issues from a global perspective and in proposing solutions at community, regional, or national levels.

- **Outline:**
  To fulfill the vision, RDS provides:
  - A wide-range of interdisciplinary academic subjects
  - Language education (including various levels of Japanese language courses)
  - Small discussion-oriented seminars
  - Field work in Japan and abroad
  - A specialized program (students select one of six research fields)
  - Undergraduate thesis advice and direction

RDS Department helps students gain valuable knowledge and skill in several fields of study, as well as specialized expertise in their chosen field. International students can earn their degrees through an English track and study Japanese. This department also provides a 5-year combined degree program for both Bachelor and Master degrees.

- **Attractive Features:**
  - Hakusan Campus (centrally located in Tokyo)
  - English-only track for international students
  - Five year combined program for undergraduate and graduate school studies (Bachelor and Master Degrees)
  - Japanese language proficiency development

- **Degree Offered:**
  Bachelor of Regional Development Studies

- **Successful Graduates Will:**
  - Contribute to the international community as regional development experts
  - Have sufficient knowledge and communication skill to work in both local and global communities

- **Career Paths:**
  - International institutions, global companies, local and central government, media industry, public regional development agencies, NPOs, professional consultants, etc.

Information Networking for Innovation and Design (INIAD)

Campus: Akabanedai

- **Areas of Study:**
  - Computer Science, Engineering and Economics Related to Design and Infrastructure
- **Enrollment Capacity:**
  - 400 students per year
- **Full Scholarship Availability:**
  - 20 first-year international students will be selected to receive the Top Toyo Global Scholarship A. See p.3 for details.
- **Admission:**
  - April/September
- **Language of Instruction:**
  - Japanese/English

**Vision:**
New technologies and values are created daily. What is required in this era are individuals who can quickly bring new ideas to life and provide new services to society. This department aims to foster individuals who have the ability to cooperate globally, to share ideas, knowledge, technologies, and identities to bring a positive impact to the world.

**Outline:**
From the second year, students will enroll one of the department’s four courses.
- **Information Networking Computer Science & Engineering Course**
  - Students acquire the skills to support the technological aspects of information networking and optimize new information services.
- **Information Networking Digital Design Course**
  - Students acquire the skills to support networking from the viewpoint of designing and giving shape to new information services and products.
- **Information Networking Business Innovation Course**
  - Students acquire the management skills necessary to start new businesses through networking.
- **Information Networking Social Infrastructure Course**
  - Students acquire the skills to work with information technologies and apply them to the creation of an enriched society with a higher quality of life.

**Features:**
- Implementation of beginner level computer science and programming education in all courses
- Implementation of multi-year team-based practical training in which students put information network education into practice
- Acquisition of practical intellectual communication skills to resolve shared issues with multinational teams of students from different fields of expertise

**Degree Offered:**
Bachelor of Information Networking for Innovation and Design

**Successful Graduates Will**
- Demonstrate the ability to build information services using state-of-the-art knowledge of computer science
- Bring a fresh perspective and practical know-how to the concept of future services and products
- Create new businesses using the skills and knowledge acquired in the team-based practical training modules
- Work with information technologies and apply them to the creation of an enriched society with a high quality of life

**Career Paths:**
- ICT-related companies, public agencies, construction industry, commercial world, service industry, system engineers, programmers, website designers, consultants, marketing professionals, researchers, etc.

Student Life

Clubs
Toyo University strongly believes that student activities contribute to the enrichment of campus life. With 41 athletic clubs and over 300 other student clubs and groups, everyone can find a group of students that shares their interests.

International Student Association
The International Student Association is a place where international students can discuss their problems and help each other. Also the International Student Association hosts various social events each year.

Sports Center
Students can take physical education classes at Toyo University’s world-class Sports Center. Opened in 2013, the Sports Center offers an Olympic-sized swimming pool, as well as facilities for all manner of sports classes and is just a short train ride from Hakusan Campus.

English Community Zone (ECZ)
The ECZ is a lounge type space on campus where Toyo students and international students get together to relax, play games, listen to music, and hang out — in English. In addition, the ECZ hosts evening events every month, such as spring party, beach party, pajama party, Japanese community zone gathering, Halloween party, Christmas party, and others. For students looking for a break from intensive studies, the ECZ is the perfect place to unwind and make new friends.

Cafeteria
When they’re hungry, students can dine at Toyo’s award-winning cafeteria. Delicious Italian, Indian, Korean, Chinese, Turkish, and of course Japanese cuisine are available at low prices.
Supports for International Students

International Student Insurance
In cases where a student suffers a serious illness or injury, the cost for the student’s family to visit Japan will be covered by the Toyo University International Student Compensation System.

Health Consultation Office / Health Center and Student Consultation Office
At Health Consultation Office / Health Center on campus there are doctors and nurses to take care of any sudden illness or injuries. The student consultation office provides counseling services for health concerns, worries or any other problems the students are facing. All medical services and treatment are provided for free of charge.

Housing
Toyo University arranges housing for Toyo Top Global Scholarship A recipients during their first year. Students live in university-arranged housing and they are responsible for the rent (70,000 yen per month). For their second through fourth year of study, Toyo Top Global Scholarship A recipients find their own housing. The university can provide information about agents who can assist students in their search for accommodation.

Career Support Programs
Toyo University offers several programs to help international students develop their careers in Japan, including business language programs, job hunting seminars, workshops on CV writing, interview tips and business etiquette.

International Student I-Turn Employment Promotion Program
This program aims to promote “I-Turn Employment,” which refers to bilateral efforts to connect foreign students in Tokyo with rural companies. Toyo University provides international students with business Japanese language courses and career education as well as matching opportunities for them and excellent rural companies through study tours to rural cities and work experience at rural companies.

---

Japanese language education

- JLPT-N2 Enrollment → N1 Level Pass → BJT-J1 Level Pass
- JLPT-N3 Enrollment → N2 Level Pass → N1 Level Pass

Graduation Employment

- Freshman: 250h
- Sophomore: 250h
- Junior: 250h
- Senior: 250h

Job hunting

- Internship in Tokyo (two weeks in spring)
- Internship in rural area (two weeks in summer)
- Joint company information session in Tokyo
- Career education course (2nd half of year)

Consulting

- Career education for employment / Internship etc.
Admission

* GINOS Global Innovation Studies / RDS Regional Development Studies / INIAD Information Networking for Innovation and Design
** Interviews will be conducted in English using the online conference system. Candidates cannot choose the date of the interview. Details including the instruction for the web conference system will be provided to those who are invited for the online interview upon submission of the application documents.

Eligibility

Eligible persons must satisfy all of the following conditions (1 to 4):
1. Applicant is a national of a country other than Japan.
2. Applicant resides in a country other than Japan at the time of application and the time of the interview.
3. Applicant has completed the coursework of 12 years in school education in a country other than Japan (or is expected to complete such education by March 31, 2020) or the equivalent.*
4. The person is seeking to enter Toyo University (desired department and course) as his or her first choice.

* (Note)
(1) Applicant who has completed a 12-year education curriculum in fewer than 12 years due to skipping a grade(s) or graduating early in a country that bases eligibility for admission to a university on a 12-year education curriculum.
(2) Applicant who has completed the curriculum of a school that is designated by the Ministry of Education, Culture, Sports, Science and Technology (MEXT).
(3) Applicant who satisfies one of the following conditions (①, ② or ③) and who reaches the age of 18 by March 31, 2020.
   ① Applicant who has completed school in a country with an ordinary education curriculum of fewer than 12 years prior to a university enrollment and has completed (or is expected to complete) a university preparatory course for admission to a Japanese university that is designated by MEXT.
   ② Applicant who has completed school in a country with an ordinary education curriculum of fewer than 12 years prior to university enrollment and is recognized by Toyo University as having completed a program equivalent to a 12-year curriculum based on an official certificate (e.g. certificate received for passing a high school equivalence examination, etc.) issued by that country.
   ③ Applicant who holds an International Baccalaureate degree, Baccalauréat qualification (French Republic), Abitur qualification (Federal Republic of Germany), or GCE Advanced Level qualification.
(4) In addition to the aforementioned, applicant who possesses a qualification recognized by Toyo University as being equal to or more advanced than the 12-year education curriculum and applicant who reaches the age of 18 by March 31, 2020.
Language Requirement

TOEFL iBT79, TOEFL PBT 550, IELTS 6.0, TOEIC 780

*Scores must come from tests taken no earlier than September 1, 2017 for April Admission/ January 1, 2018 for September Admission.
*TOEFL ITP, TOEFL CBT, IELTS (General Training Module), and TOEIC-IP scores will not be accepted.

How to Apply

Qualified applicants should
1. Download the Application Guide from the Pre-Arrival Entrance Exam website http://www.toyo.ac.jp/nyushi/en/admission/
   Carefully read the information about the application requirements and process.
2. From the Pre-Arrival Entrance Exam website above, find a link to the application portal to start the online application process. (You can only start the application for your selected admission type during its designated application period.)

※The amounts described above are for 2018, and are subject to change in 2019.
Toyo University’s Hakusan Campus offers easy access to both of Tokyo’s international airports, and it is just a few subway stops away from many of Tokyo’s most iconic areas—Shibuya, Akihabara, Ikebukuro, and Shinjuku. Despite its central Tokyo location, Toyo’s Hakusan Campus is characterized by a calm atmosphere that is highly conducive to learning. Sleek, contemporary architecture is offset by lush greenery and open spaces. Just off campus, temples and shrines, hundreds of years old, offer opportunities for quiet reflection. Like Tokyo itself, Hakusan Campus is modern and cosmopolitan, with a quiet side just around every corner.

Building No. 10
The latest educational facility opened in April 2017. Ingenious designs with safety and the environment in mind have been incorporated into various elements of the building. GINOS studio (Communication zone for GINOS students) is located on floor 1.

University Library
The library takes up two basement floors and two floors above ground. It houses nearly one and half million volumes and offers plenty of comfortable study areas.

As the location for the new Faculty of Information Networking for Innovation and Design, Toyo’s Akabanedai Campus will combine visionary technology with a warm and nurturing learning environment. Students at Akabanedai Campus will have access to the latest information and communications technology while studying at a modern campus in Central Tokyo.

Media Center (Digital Library)
The Media Center is a library with “no” books. It provides students/staff with access to a wide range of digital archives and special collections.

Seminar Room
The campus has small multi-purpose seminar rooms as its major features. The rooms are suitable for use as incubation facilities and training spaces.
Asaka Campus is located in a tranquil environment along the Kuromegawa River just outside of Tokyo and is blessed with plenty of recreational spots, athletic fields, and open spaces. As the home for Toyo’s Faculty of Human Life Design, Asaka is well-regarded throughout Japan for its special facilities for education through sports, healthcare support, music, and childcare.

Nestled in the middle of a serene forest on the outskirts of Tokyo, Toyo’s Kawagoe Campus offers a calm, even meditative environment for studying. Its natural surroundings are all the more noteworthy considering they serve as the setting for Toyo’s Faculties of Life Sciences, and Food and Nutritional Sciences, both of which are at the vanguard in their respective fields.

Itakura Campus offers a thoroughly modern learning space surrounded by a rich natural environment. In addition to its state of the art labs and learning centers for the Faculties of Life Sciences, and Food and Nutritional Sciences, Itakura Campus also features a variety of sports facilities and easy access to vast ecological treasures.
