Abstract

1) Purpose of Study
Nowadays, people’s consciousness for toilets is dramatically increased in Japan, so demands for toilet are diversified and rose. Until today, toilets have a long history and of course used in many places. They are developed so fast as often as social movement was happened or economy was grow. At the sightseeing field, toilets position and facilities are also changed with big event and economy growing.

However, toilets are not seems as important point since today. Not only the situation of sightseeing but also our daily life, toilets have a big influence. So in this study, author tries to declare the present condition toilets witch concern sightseeing and find the solution with some cases.

2) Contents of Study
This study looks two sites of Kurashiki city in Tottori and Ohara area in Kyoto and how good using toilets in those place as part of budgets. These two places use toilets so effective so throughout these cases, problems and possibility that have been found in toilets in various sightseeing areas are appear. Author tries to give the suggestion for them and thinks the potential of relationship between toilets and sightseeing.

In addition, by thinking about toilet changing and recent toilet trend, the importance of toilets for sightseeing and changing of consciousness for toilets are found.

3) Resent of Study
There are main 4 problems toilets in Japan. Budget, Maintenance, Lacking, Saving are keyword of issues. Most toilets in sightseeing area are not maintenance so well and this situation brings about 5K condition and make people’s feeling bad or reduce the place’s reputation. Also, lacking is big problem in sightseeing area and the facilities related to sightseeing. At the peak time, visitors have to wait long time just to use toilets. In addition, water and power saving become the important trend nowadays in Japan because of several disaster and of course, less budget makes all issues worse.

However, there are also some solutions for these problems. The most important point is to find the best way witch fits that region. To do this, all region effort and more consciousness for toilets are necessary.
